## EDUCATION

**BMS College of Engineering, Bengaluru, Karnataka** **Oct 2023 – Present**

B. Tech in Computer Science & Engineering **CGPA – 9.27/10**

***Relevant Coursework* –** Data Exploration & Visualization (DEV), Big Data Analytics, Machine Learning, Theoretical Foundations of Computation, Artificial Intelligence, Computer Vision

## PROJECTS

**Enterprise Lead Management Platform (Personal Project)** **Jul 2026**

- **Built** a full-stack AI-powered lead management platform using **FastAPI, React, TypeScript, and SQLAlchemy**, integrating **WhatsApp Business API** and **Claude-based NLP** to automate real-time lead extraction, validation, and deduplication
- **Implemented** JWT-based **role-based access control** across **5 user roles** with a Bronze/Silver/Gold data pipeline, automating AI-driven lead enrichment, representative matching, and a **24/48/72-hour** reminder and escalation engine to improve SLA compliance

**Raksha Netra – AI-Powered Fraud Detection System, BMSCE, Bengaluru** **Apr 2026**

- **Designed** an AI-powered fraud detection system using Python, scikit-learn, and XGBoost to analyze transaction patterns, comparing ensemble and baseline models to improve the identification of fraudulent financial transactions
- Implemented an **end-to-end machine learning pipeline** using Pandas, NumPy, Matplotlib, and Seaborn for data preprocessing, feature engineering, model development, and real-time fraud prediction through a Flask web application
- **Evaluated model performance** using Accuracy, Precision, Recall, F1-score, ROC, and Precision-Recall curves, prioritizing high recall to minimize false negatives while incorporating scalable deployment, low-latency inference, and periodic model retraining

**Drug–Drug Interaction Prediction, BMSCE, Bengaluru** **Mar 2026**

- **Developed** an AI-powered drug interaction prediction system using Python, RDKit, and DrugBank/TWOSIDES datasets, engineering molecular fingerprints and CYP450 features to classify interactions into **5 clinically relevant risk categories**
- Built a **two-stage XGBoost classification pipeline** with scikit-learn, leveraging SMOTE and ADASYN to address class imbalance and targeting **0.90** severe-case recall, **0.80** macro F1-score, **0.91** severe precision, and **sub-10 ms API latency**
- **Deployed the solution** through FastAPI and Streamlit, delivering real-time predictions with confidence scores and SHAP-based explainability, while evaluating performance using Accuracy, Precision, Recall, F1-score, and ROC-AUC

## WORK EXPERIENCE

**AI & Logistics Intern – Gulf Warehousing Company (GWC), Doha, Qatar** **Jun 2026 – Jul 2026**

- **Analyzed warehouse and supply chain operations** across Logistics Village Qatar (LVQ) and Bu Sulba, studying inventory management, distribution workflows, and enterprise logistics processes using Databricks and Anchanto WMS
- **Built dashboards** to monitor operational performance and support data-driven decision-making for warehouse and logistics teams
- **Supported the IT team** in developing AI-driven solutions by creating a structured **"Do's and Don'ts" FAQ knowledge base** used to train AI models, improving response consistency and streamlining information retrieval
- Leveraged Claude Code and Co-Work to assist with **AI-enabled workflow documentation and automation initiatives**, reducing repetitive manual queries and supporting day-to-day operational efficiency

## EXTRA-CURRICULAR ACTIVITIES

**Member, Hostel Cricket Team, BMS College of Engineering** **Nov 2023 – Present**

- **Represented** the hostel cricket team for three years, competing in inter-hostel tournaments involving **6 to 7 teams** while contributing to team performance through consistent participation, coordination, and sportsmanship

**Member, Hostel Volleyball Team, BMS College of Engineering** **Nov 2023 – Present**

- **Competed in inter-hostel volleyball tournaments**, collaborating with teammates across **6 to 7 hostel teams** and contributing to the team's performance through discipline, teamwork, and consistent participation

**Member, Rotaract Club, BMS College of Engineering** **Nov 2023 – Present**

- Supported the **planning and execution** of community service initiatives, including blood donation drives, environmental campaigns, educational outreach, and fundraising events, **collaborating with club members** to ensure successful event delivery

## SKILLS

**Languages –** English (Fluent), Telugu (Native), Hindi (Conversational), Urdu (Conversational), Kannada (Basic)

**IT Skills –** Python (Pandas, NumPy, scikit-learn, XGBoost, Random Forest, OpenCV, MediaPipe, Matplotlib, Seaborn, RDKit, SHAP, FastAPI, Flask, Streamlit), Java, C, SQL, Git, GitHub, HTML, CSS, REST APIs, Microsoft Office (Excel, Word, PowerPoint), Figma

Flat No. 504, Sai Shakti Towers, New NGOs Colony, Nizamabad, Telangana, 503002
